SAFETY INSTRUCTIONS

- This hike requires good weather and snow to avoid hazards. In case of bad weather, the guides can make the decision to cancel / modify / shorten certain steps because in Romania there is no system to explode the snow and the rescue service is slower than that of the Alps!

- If we can not reach an accommodation booked due to the weather conditions (that we can not expect more than 2 days in advance), the participants will have to cover the price of the accommodation where we will be able to arrive and shelter.
